

Subject: Invitation for a brief video showing how to bake bread in a solar cooker
3rd April 2021

Dear solar friends

We are planning a CONSOLFOOD webinar about baking bread in a solar cooker.
We invite all solar cooks to send us a brief video showing us how to bake bread using the sun!

If you are interested please prepare your video soon.

Here are our guidelines for the final webinar we have planned.

- a) The videos should be no longer than 90 seconds.
- b) We will select videos for the webinar which best illustrate the baking of bread in the major types of solar cookers.
- c) Videos selected for the CONSOLFOODwebinar will be compiled in a YouTube playlist for ease of presentation during the webinar.
- d) We will include all videos in another public YouTube playlist for all to view later at their convenience.
- e) We include *suggested* maximum length in seconds, for each of ten components we would like to see in the video. Please see Table below.
- f) We highly recommend subtitles, if possible, apply captioning for audio/speech to the video.
- g) If at all possible, also produce captions in home language, for wider appeal.

Instructions for sharing your video:

Please share your video via Google docs, DropBox or other service so it can be uploaded to a Youtube Playlist. When provided this way, we can use Youtube's automatic captioning service as necessary. Note that while the service is very good, it is sometimes not accurate in transliterating the spoken word.

If sharing the video this way is not possible, please upload your video to YouTube or other video online service.

Please email your YouTube or other video link to Luther Krueger at kruegerian@gmail.com before 30 April 2021. The final date and programme of this CONSOLFOODwebinar will be announced after 30 April 2021.

Best sunny regards

Celestino Rodrigues Ruivo (Chairman CONSOLFOOD)

Luther Krueger (Collecting videos for the
CONSOLFOODwebinar, kruegerian@gmail.com)
